

# Nigerian Institution of Metallurgical, Mining & Materials Engineers

(A Division of The Nigerian Society of Engineers)

*in collaboration with* **PECS Training**  
*Presents Workshop on:*

## ADVANCED ENGINEERING PROJECT MANAGEMENT

### OBJECTIVE

This workshop relates to large projects and the different phases in their management and execution. It seeks to provide a good understanding of the practical relationships between the phases and interaction among the component elements for the attainment of effective and successful management of projects.

All the key players are focused-owner, engineering contractor, general contractor – will learn their responsibilities and practical issues that lead to physical progress and achievement of on-scheduled deliveries.

### HIGHLIGHTS

- Overview of Project Management and reasons why Projects Fail
- Cost Estimation and Project Budget Development
- Tender Evaluation Procedure: Keepner Tregoe Bid Comparison Tool & other methods
- Team building, People and Issues Management
- Construction Management Systems
- Cost Control and Earned Value Analysis
- Risk Management of Construction Projects: Nigerian Case Studies
- Project Document Management
- Managing Project Close Out

### FOR WHOM

Project personnel-Manager, Engineers, Supervisors, Technical & Facilities Managers, Engineer Contractors, Accounting & Finance Personnel, Consultant

### PARTICIPANTS WILL LEARN

- The different types of contracts and how to appraise them
- Understand the relationships between project phases and the essential roles of all players
- Plan, schedule, monitor and control the components in major projects
- Closeout projects in a professional fashion
