

Nigerian Institution of Metallurgical, Mining & Materials Engineers

(A Division of The Nigerian Society of Engineers)

in collaboration with **PCS Training**
Presents Workshop on:

Developing & Implementing Quality Systems for Organisational Transformation

INTRODUCTION

Quality management strategies have been proven as a potent tool for attaining organizational transformation. The achievement of quality system standards by organizations - both big and small, elevates their status and performance in specific areas where they are compliant. The new status conferred by such quality standards have become the 'golden fleece' of today's businesses as it is capable of opening the gate way to global business acceptability.

With the transition to ISO 9001/2015 standard, this course harmonizes the new elements of the standard with established quality principles for repositioning organizations/businesses by adopting processes, products and services that command the customer's confidence. It shows how organizations can become globally focused and accelerating along the path of success.

HIGHLIGHTS

- Understanding Quality Systems & Standards
- Overview of ISO 9000 Standards Principles
- The Balanced Score Card
- Steps in Implementing Quality Management Systems
- Quality System Certification Processes
- Keys to application of ISO 9001
